

Cue

**Not sure how to reply?
Cue has a suggestion.**

An AI keyboard that combines conversation context,
what you want to say, and your writing style.

When finding the words is hard

What should I say?

You want to offer support, clear up a misunderstanding, or flirt a little. Finding the right words and tone can be hard.

What am I missing?

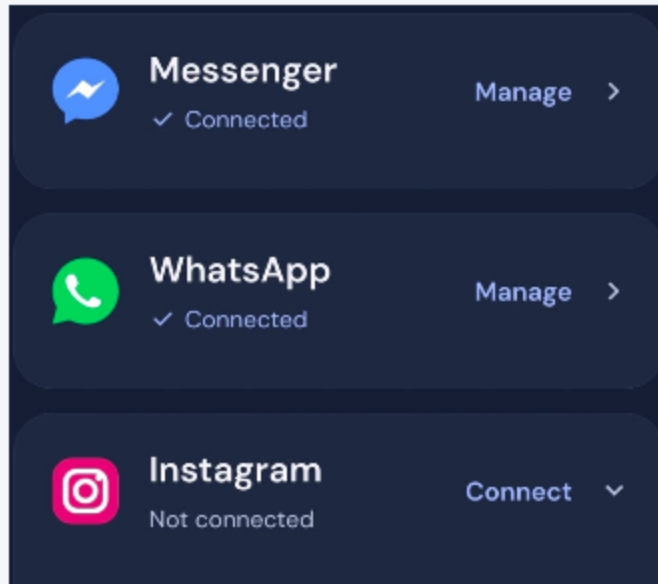

Important events, preferences, and promises get buried in the chat history.

“finally done 🙄”

Do you remember the exam they were so stressed about?

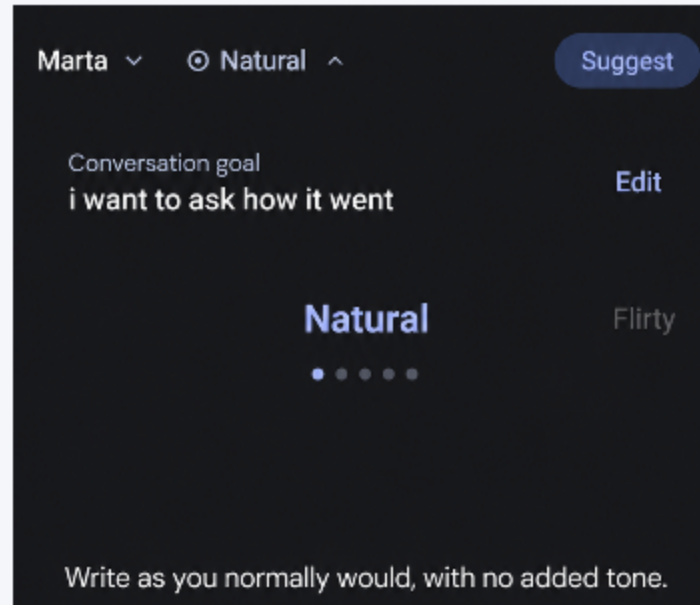

Cue, right where you type

01 Connect an account

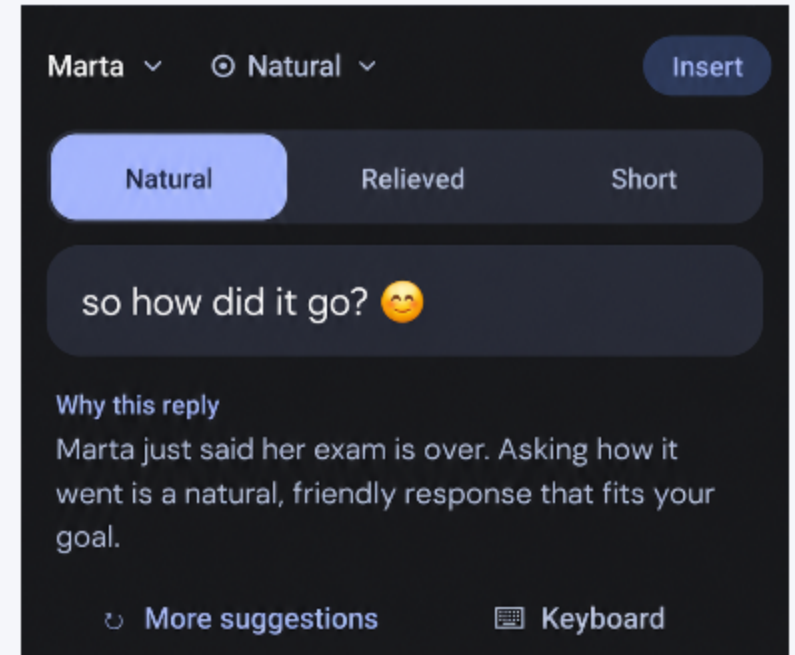

Messenger or WhatsApp.
Context from your chosen
chat.

02 Set your intention

Say what you want to express.
Choose a tone.

03 Get a suggestion

A reply in your own voice,
right in your keyboard.
You review, edit, and send.

Memory keeps up with the conversation

Marta · demo conversation

thanks for the ticket! i owe you 50 zł.
i'll pay you back tomorrow.

actually, the day after tomorrow,
is that okay?

sent 20 zł out of the 50 zł.
i'll send the rest the day after tomorrow.

sent the remaining 30 zł too.

got it, we're all settled :)

Cue remembers

Amount owed

Remaining

50 zł → **30 zł**

Settled in full

Tomorrow → day after tomorrow

Cue's saved note

"Marta paid you back the full 50 zł
for the ticket."

A reply that sounds like you

Incoming message · Marta

Want to meet up tomorrow?

Without your style context

Sure, I'd love to meet up.
What time works for you?

More formal

With your style context

yeah sure, what time?

Short messages · lowercase
